

Natural Smooth Hygienic Cat Litter

■ Smells Fresh - Safe absorption of Odours

Each pellet contains a natural active substance, which captures the odour molecules immediately. Resulting in no unpleasant smells keeping the used pellets staying fresh.

■ Light Pellets - Clean, smooth and easy on the paws

This Cat Litter will not disintegrate after use. It remains compact; a major advantage over clay litters and pressed sawdust pellets.

■ Extremely Absorbent - Economical and dust free

Made from paper cellulose hygienic waste, free from dust and will absorb twice as much liquid as regular cat litters.

■ 100% Compostable - Antibacterial safe waste

Dispose the bio-waste into the garden flower compost (not veg compost bins).

Bio-Catolet also takes care of the well-being of your other pets, rodents, rabbits, etc.

Bio-Catolet fully meets the requirements of the conscientious cat owner, both in hygiene and environmental matters. It is unique and the cats just love it!

■ Big in Volume - Lightweight to carry

Two bag sizes available; 12 litres and 25 litres.

■ 100% recycled - High eco-competence

Bio-Catolet is made from 100% paper related products, which are mechanically pressed into absorbent pellets.

■ Pollution free - Ecologically exemplary

Fast (within 3 weeks) decomposition

■ Insect repellent - Antibacterial

Prevents the spreading of bacteria.
